

# TWACS® Net Server with TWACS OC Software

The heart of the TWACS system, with its easy-to-use graphical interface, provides fast access to AMI data, allowing utilities to promptly answer customer inquiries.

The **TWACS Net Server (TNS) with TWACS OC (Operations Center)** software manages the TWACS communications network and controls advanced metering data for utilities. The software employs a relational database and a Windows-based interface to manage the data generated by a utility's metering operations.

## TNS with TWACS OC delivers

### Server/client control

- Firewall compatible
- Flexible system accessibility
- Permissions-based data access
- Enhanced upgradeability

### Network management

- Intuitive setup and configuration
- Simple updates and modifications
- Two-way addressing for communication
- Minimal substation maintenance

### Automatic meter reading

- Commercial metering with demand reset
- On-request meter reads
- Tamper detection and diagnostics
- Billing file creation and integration

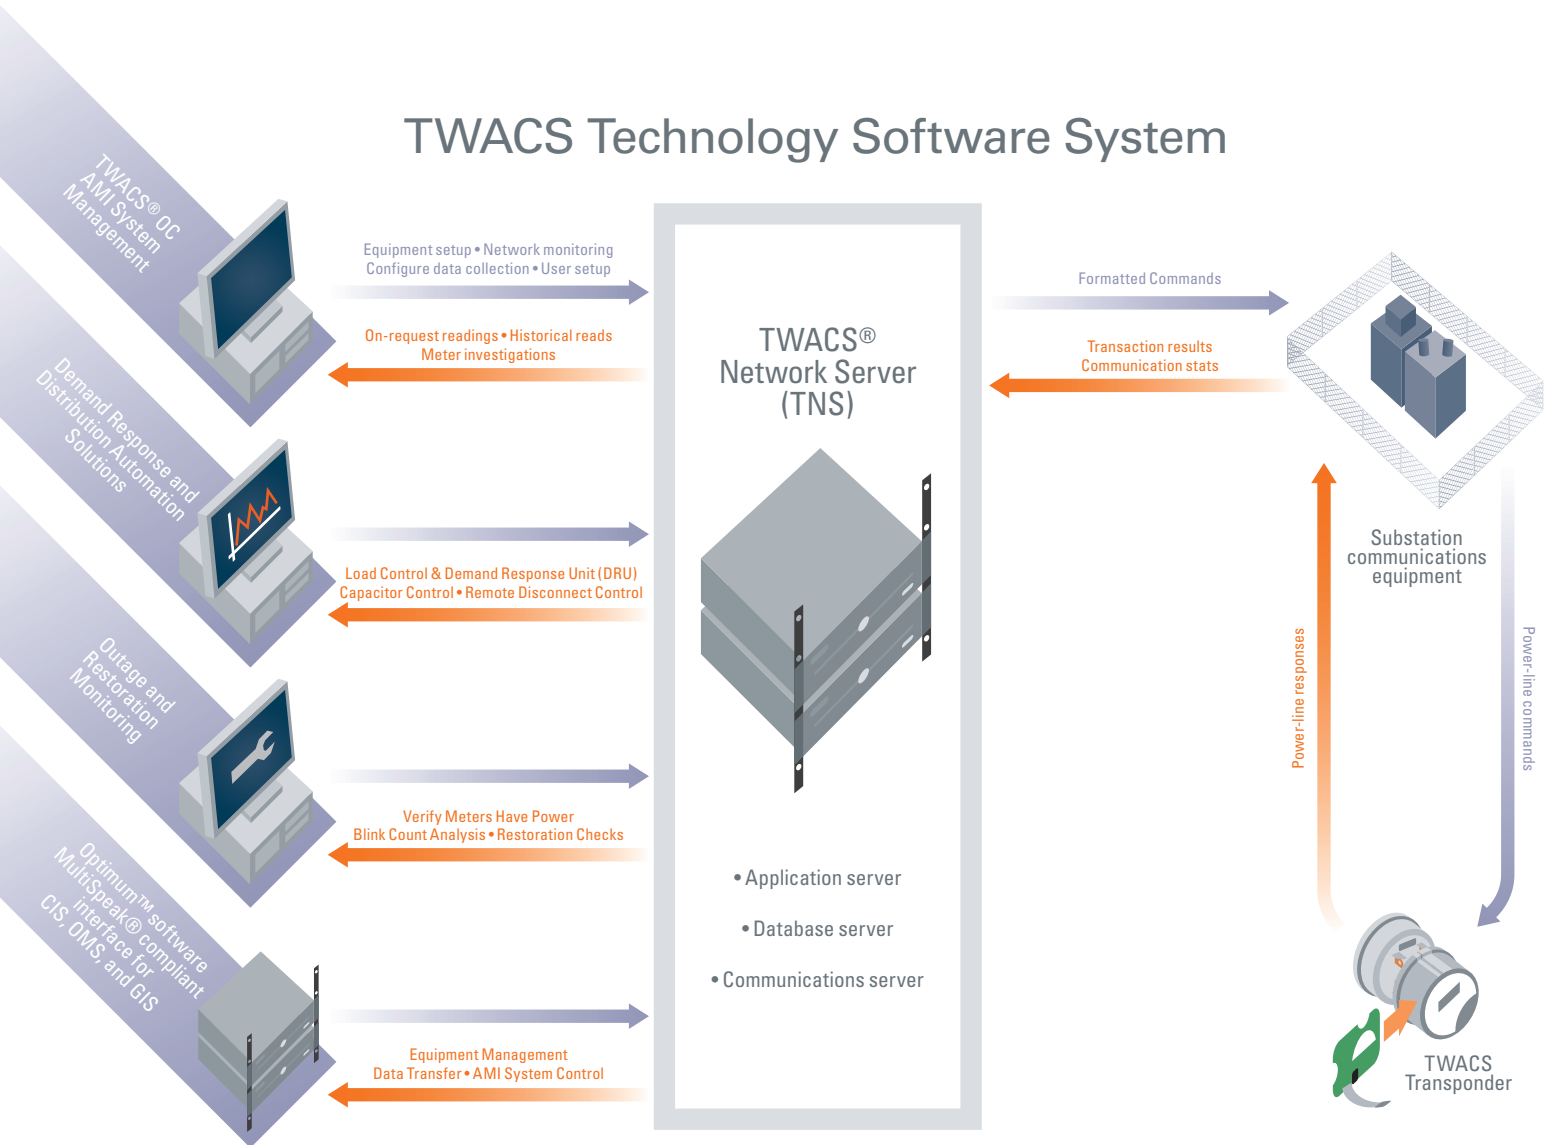

### Third-party interfaces

- Customer information systems
- Billing programs
- Meter data management systems
- Load research software
- Outage management solutions

### Optional TNS applications

- Power Reliability Outage Assessment System (PROASYS™)
- Prepaid UtiliSales™
- Demand response system
- Distribution automation solution
